

### DETAILED CLAIM LISTING

The following is a detailed listing of all claims that are, or were, pending in the present application. Please cancel claims 9-25, amend claim 5, and add new claims 26-37 as set forth in this detailed listing.

1.     **(Original)**     An inbound automatic notification system comprising:
  - (a)     at least one client processor configured to receive information about a plurality of assets;
  - (b)     a notification processor configured to receive the information from the at least one client processor; and
  - (c)     a database configured to receive the information from the notification processor.
2.     **(Original)**     The notification system of claim 1 wherein the notification processor is further configured to standardize the information.
3.     **(Original)**     The notification system of claim 1 wherein the notification processor is further configured to evaluate the information.
4.     **(Original)**     The notification system of claim 3 wherein the notification processor is further configured to identify actionable information based on the evaluation of the information, wherein the notification processor is configured to transmit a notification relating to the actionable information.
5.     **(Amended)**     An outbound automatic notification system comprising:  
a database ~~configured to store~~ comprising stored information about a plurality of assets;  
a processor in communication with the database,

the processor configured to track information about the plurality of assets and transmit a notification upon a certain condition relating to one of the plurality of assets being met, wherein the information about the plurality of assets comprises at least the stored information.

6. **(Original)** The notification system of claim 5 wherein the notification is an electronic communication.

7. **(Original)** The notification system of claim 5 wherein the notification is configured to be sent to an owner/operator.

8. **(Original)** The notification system of claim 5 wherein the notification is configured to be sent to a service provider.

9-25. **(Canceled)**

26. **(New)** The notification system of claim 4, wherein the evaluation of the information comprises evaluation of at least the information in the database.

27. **(New)** The notification system of claim 1, wherein the notification processor is further configured to track the information about the plurality of assets and transmit a notification upon a certain condition relating to one of the plurality of assets being met.

28. **(New)** The notification system of claim 27, wherein the information about the plurality of assets comprises at least information stored in the database.

29. **(New)** The central asset management system of claim 9, wherein the information from a plurality of notification systems is relevant to managing each of the plurality of asset of a plurality of enterprises.

30. **(New)** A central asset management system comprising:
- (a) a central processor accessible on a computer network, the central processor configured to track asset information relating to at least one of a plurality of assets;
  - (b) a database in communication with the central processor, the database configured to store the asset information;
  - (c) a notification processor in communication with the central processor, the notification processor configured to:
    - (i) receive the asset information from the at least one asset;
    - (ii) standardize the asset information from the at least one asset, whereby the information is compatible with the central processor;
    - (iii) track the asset information, including the asset information stored in the database, to identify at least one certain condition relating to at least one of the plurality of assets; and
    - (iv) transmit a notification upon one of the at least one certain conditions being met.
31. **(New)** The central asset management system of claim 30, wherein the notification processor is further configured to receive the asset information from at least one notification system.
32. **(New)** The central asset management system of claim 31, wherein the notification processor is in communication with the at least one notification system through one of at least one modems.

33.     **(New)** The central asset management system of claim 31, wherein the notification processor is in communication with the at least one notification system through the Internet.

34.     **(New)** The central asset management system of claim 31, wherein the at least one notification system is an asset control system.

35.     **(New)** The central asset management system of claim 30, wherein the plurality of assets are located at at least one location of an enterprise.

36.     **(New)** The central asset management system of claim 30, wherein the plurality of assets are located at a plurality of locations of a plurality of enterprises.

37.     **(New)** The central asset management system of claim 30, wherein the notification is an electronic communication.
